

Toekomstmuziek - Bartender/Waitress/Waiter with a passion for music!

Who are we?

Toekomstmuziek is a place where it all comes together in the Houthavens in Amsterdam. To begin with a music venue for talented up and coming musicians & bands, however in essence so much more. A cultural hub, a second home in the neighbourhood where you can enjoy art, music, street food, craft beer & -wine and, most importantly, each other. A place with the philosophy to reform the music sector and make it more sustainable for the musicians and bands who create the music and to make experiencing music “live” accessible for everybody.

What does Toekomstmuziek mean?

Toekomstmuziek in Dutch means quite literally music of the future, however it's also a saying referring to something that has not happened yet, but might in the future, depending on whether things will change for the better so that it can be realized. The term/saying is used when we're talking about topics that have a somewhat utopian character like no more pollution, no more war and, in the case of Toekomstmuziek, a more sustainable music industry for the musicians & bands who create the music and a more inclusive society in terms of enjoying live music and art. We believe that by approaching and doing things differently we can have a positive impact on the music sector and society & the world in general. The most important thing is to let go of preconceptions, have the creativity to think out of the box and come up with new concepts and to have the courage to implement them.
